

of the building has the same arrangement of windows, doors, and louvers as other quonsets built in 1946 under the Federal Works Agency Project Ohio 33-V-5. (See, for example, Buildings 242 to 248.) Therefore, 1947 appears to be the probable date of construction, but no proof has been found.

2. The building does not appear in Photograph X 1056, which was taken in early 1949.

3. It is possible that this building was moved to 1000 West Lane and is now listed as Building 161. Building 161 is similar in design and construction, and was in place at the Lane Avenue location in 1949. (See Part B of report on Buildings 159/62.) Mr. Paul H. Elleman believes that H 464 was moved to 1000 West Lane Avenue, but is not positive.

4. I have talked with ten present and former Service Department employees, and none recalls the building.

5. No one on the Power Plant staff was here at the time, and therefore can't recall the building.

6. Athletic Department records (minutes and reports) do not reveal any information.
